

# BIPART Platform

**The e-democracy tool  
for online participation**

Update 2022

# BiPart Platform in short

BiPart is a **software platform** that enables organizations and communities to **activate participatory processes (PP)** and **take decisions collectively**.

Explore our platform at:

[www.bipart.it](http://www.bipart.it)

# Product History

2008

*The Center for the Study of Participatory Democracy* is founded

2009-12

**Mash-up** - A first website that preceded the BiPart platform is developed as a “mash-up” that combined external services for the proposal-making (google form), the geomapping (google map), event management (google calendar) and an internal voting system.

2012-17

**Multi tenants** - The first prototype of the platform is developed and tested in several real-life settings. It is multi tenants, fully-fledged and enabled users to upload, view, discuss and vote proposals and project.

2016

*BiPart* - innovative startup is founded

2016-2017

*H2020 EMPATIA project* - It aims at developing and testing an e-participation software platform

2019-22

**Community & Process Management** - Grounded on the experience of the EMPATIA project, a newly and more performative BiPart platform is developed to support the management of the communities in participatory activities. It is also **full-rest API** in order to increase its potentials.

# Main features

- **in cloud:** no need to install the platform, the organizations always benefit from the latest version of the platform
- **responsive** to every device
- **multi-tenancy:** it hosts multiple stand alone organizations that can share PPs and community members
- **multi-language:** to support international communities and projects by keeping their native language and translating all relevant information.
- **multi-purpose:** work in parallel on different fronts and keep the costs low by facilitating and monitoring your processes while you encourage your community to share their experiences to create a broader community of practice, all in one tool.
- **personal & community space** through which registered users can save, manage and share their content and network.

# Create and customize your participatory process

BiPart is the platform that supports local authorities, third sector organizations, informal groups and companies in **defining and managing participatory processes**.

With its strategic **tools to enhance deliberation and collaboration among people** (content production, versioning, following, comment, assessment, alliances, voting system, etc.), the platform **increase the involvement of their communities in strategic decisions**.

# Collect ideas and projects

BiPart **makes sharing ideas and projects easy.** It allows the members of your community to **collaborate** in development of the ideas in a straightforward and engaging way.

You can **add a proposal** and **discover the most followed ones, comment** and **interact with their authors.**

It can manage participatory processes that involve **entire cities but also small group of people like a classroom, a team in a company.**

Each member of the community can have a different role, according to their own task!

# Engagement, mutual empowerment and assessments

Ask your community members to introduce themselves by sharing something about them in their **Personal Space**.

In addition, they will be able to **comment on ideas, share visions and expertise, collaborate** and increase opportunities for networking, knowledge and mutual growth.

Members **can interact with the proposals and their authors in different ways** based on the configuration of the platform and the design choice of the PP.

They can:  
**comment** on them  
**follow** them  
**commit** to them  
**vote** for them

**RIGENERAZIONE AREA INDUSTRIALE VIA MARCONI**

Inserisci la valutazione finale

Fattibile

**B I U**

Dopo un'attenta analisi della documentazione allegata la commissione dichiara fattibile la proposta.

**INVI**

**Fattibile**

Dopo un'attenta analisi della documentazione allegata la commissione dichiara fattibile la proposta.

**10**

Moreover, **experts** or technical staff appointed by the organization can also **assess** the proposals in order to improve them and/or to approve their eventual implementation.  
**Assessment can be made by:**

- selecting the available **status**
- rating with a **score**
- adding a **comment**

# Community management

Through the community management system you can **show and share experiences and expertises**, strengthen social ties and the **sense of community**, increase **transparency**.

The community can be organized in **groups** and every member can get assigned to and play different **roles** in the platform (evaluator, facilitator, expert....)

# Voting systems: preferences and crowdfunding

Autrice/Autore : Niccolò Giara

Costo stimato:	1500000 €
Donazioni raccolte	€ 0
