

# **BIPART** Platform

## **E-democracy Tool**

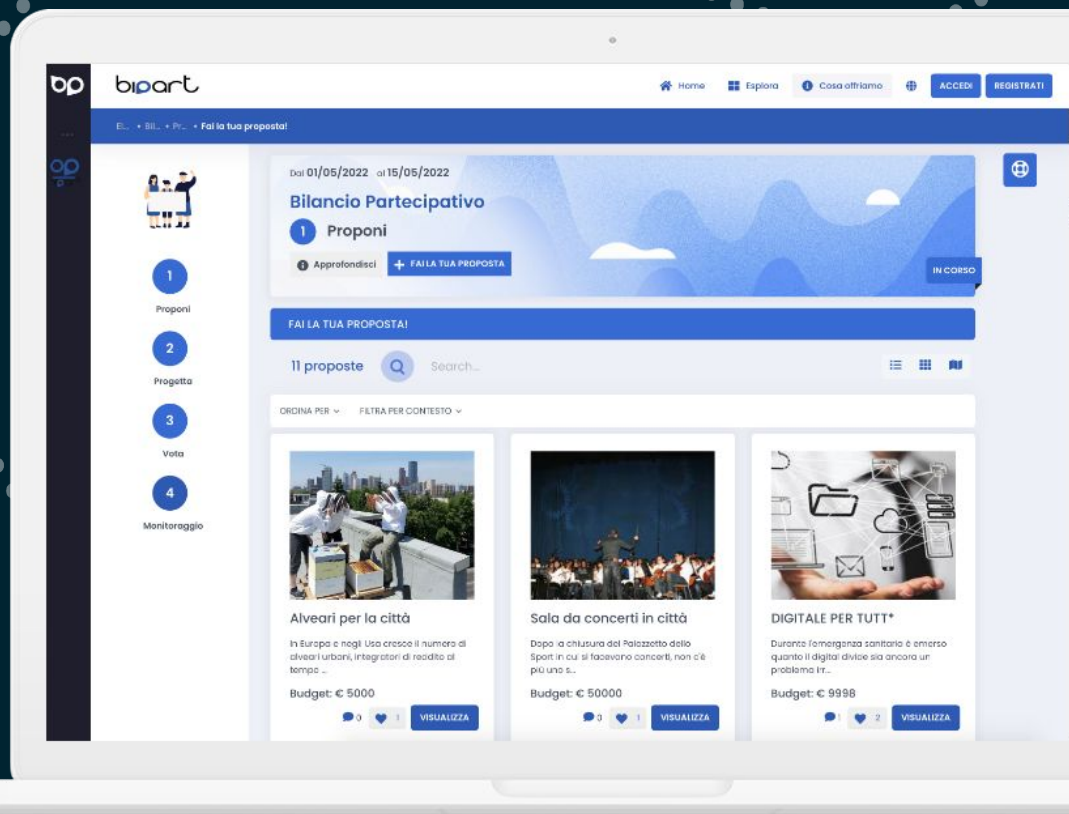

Update 2022

# E-democracy tool

BiPart is a software platform that enables organizations and communities to activate participatory processes (PP) and take decisions collectively.

[www.bipart.it](http://www.bipart.it)

# Product History

2008

The Center for the Study of Participatory Democracy is founded

2009-12

**Mash-up.** A first website that preceded the BiPart platform is developed as a “mash-up” that combined external services for the proposal-making (google form), the geomapping (google map), event management (google calendar) and an internal voting system.

2012-17

**Multi tenants.** The first prototype of the platform is developed and tested in several real-life settings. It is multi tenants, fully-fledged and enabled users to upload, view, discuss and vote proposals and project.

2016

BiPart - innovative startup is founded

2016-2017

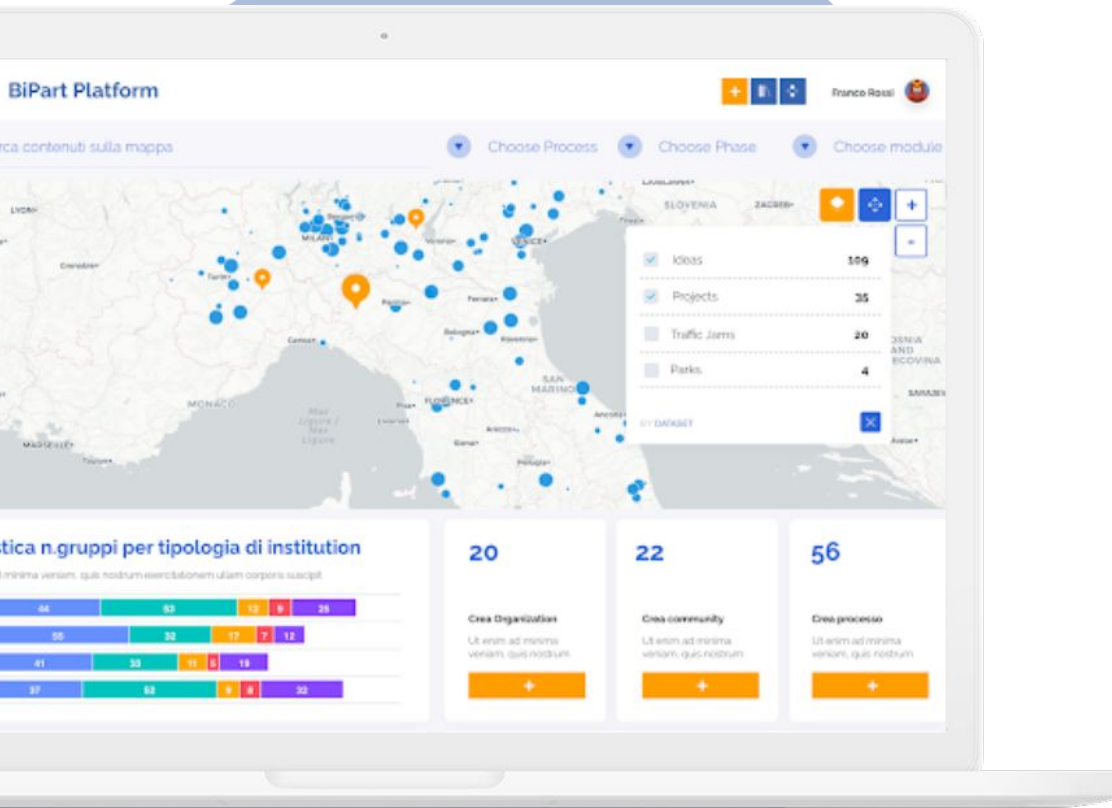

The H2020 EMPATIA project starts. It aims at developing and testing an e-participation software platform

2019-22

**Community & Process Management.** Grounded on the experience of the EMPATIA project, a newly and more performative BiPart platform is developed to support the management of the communities in participatory activities. It is also full-rest API in order to increase its potentials.

## BiPart stands out for being:

- **multi-tenants** platform where every single entity corresponds to a community and each community is **connected** one to another
- **multi-language** to support international communities and projects to interact and disseminate by keeping their native language and translating all relevant information at the same time
- **several participatory initiatives** in parallel, thus keeping costs low while facilitating the sharing of experiences among them and encouraging the creation of a broader community of practice;
- **personal & community space** through which registered people can safe and improve their contents and network.

# Create and customize your participatory process

BiPart is the platform that supports local authorities, third sector organizations, informal groups and companies in defining and **managing participatory processes**, increasing the involvement of their communities in strategic decisions.

It has strategic tools to enhance deliberation and collaboration among people (content production, versioning, following, comment, assessment, alliances, voting system, etc.)

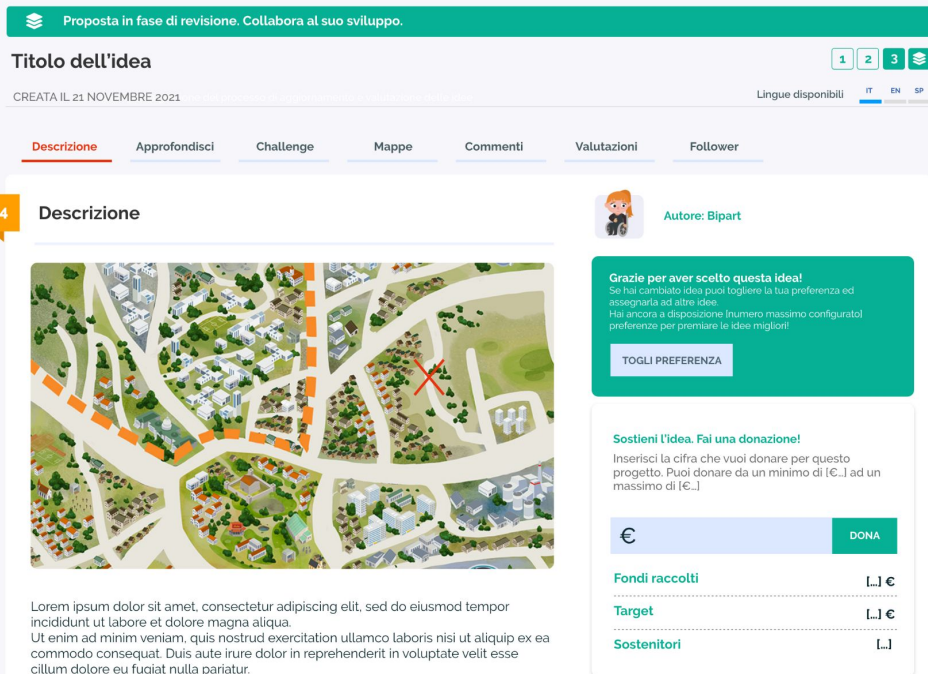

# Collect, asses and vote for ideas and project

BiPart makes sharing ideas and projects easier among the members of your community and it allows them to collaborate in their development in a straightforward way. You can **add a proposal** and **discover the most followed**, **make comment** and **interact with their authors**.

It can manage participatory processes for **any groups, from entire cities to offices**.

Each person of the community can have a different role, according to their own task!

# Authentication and verification of the members' accounts

Choose whether to involve the entire BiPart community in your processes or to authorize members personally via email or via mobile control systems

### Biografia

Sono nato a Milano l'11/02/1984 e ho sempre vissuto in zona Barona. Laureato in urbanistica al Politecnico di Milano, ho proseguito la mia attività professionale come libero professionista su tematiche inerenti all'urbanistica e alla mobilità. Entrato in Associazioni che operavano sulla valorizzazione del verde, dei quartieri e della mobilità sostenibile, ho consolidato la mia partecipazione attraverso l'impegno politico locale. Nel 2016 mi candido nel Municipio 6 e vengo nominato Presidente della Commissione Urbanistica, mobilità, verde&ambiente; nel 2021 mi ricandido sempre al Municipio 6 diventando Assessore con deleghe alla sostenibilità ambientale, urbanistica, mobilità, verde, commercio e sicurezza.

# Interactions

People can interact with the proposals in different ways, based on the configuration of the platform and the design choices of the PP.

They can:

- **comments** on them
- **follow** them
- **commit\*** to them
- **vote** for them

The screenshot shows a web interface for a challenge titled "Conoscere le malattie croniche". At the top, there are tabs: "Descrizione", "Approfondisci", "Challenge 0", "Mappe 2", "Commenti 2", and "Followers 1". A modal form titled "Come vuoi collaborare?" is open. It contains a dropdown menu labeled "COLLABORATOR", a text input field "Messaggio dell'utente", another dropdown menu "Hai una tua idea da collegare" with the option "Seleziona tra le tue idee", and a checkbox "Voglio essere ricontattato per questa proposta". There are two "INVIA" buttons. The background shows a list of proposals with a user profile "aminakali" and a note "Vorrei proporla all'interno della mia organizzazione."

The screenshot shows a final vote results page for "Mix the Empaville". It includes dates "05 May, 2021" and "13 May, 2021", and the status "Fase: FINAL VOTE | Risultati della votazione". A table lists the top proposals with their status, title, and score.

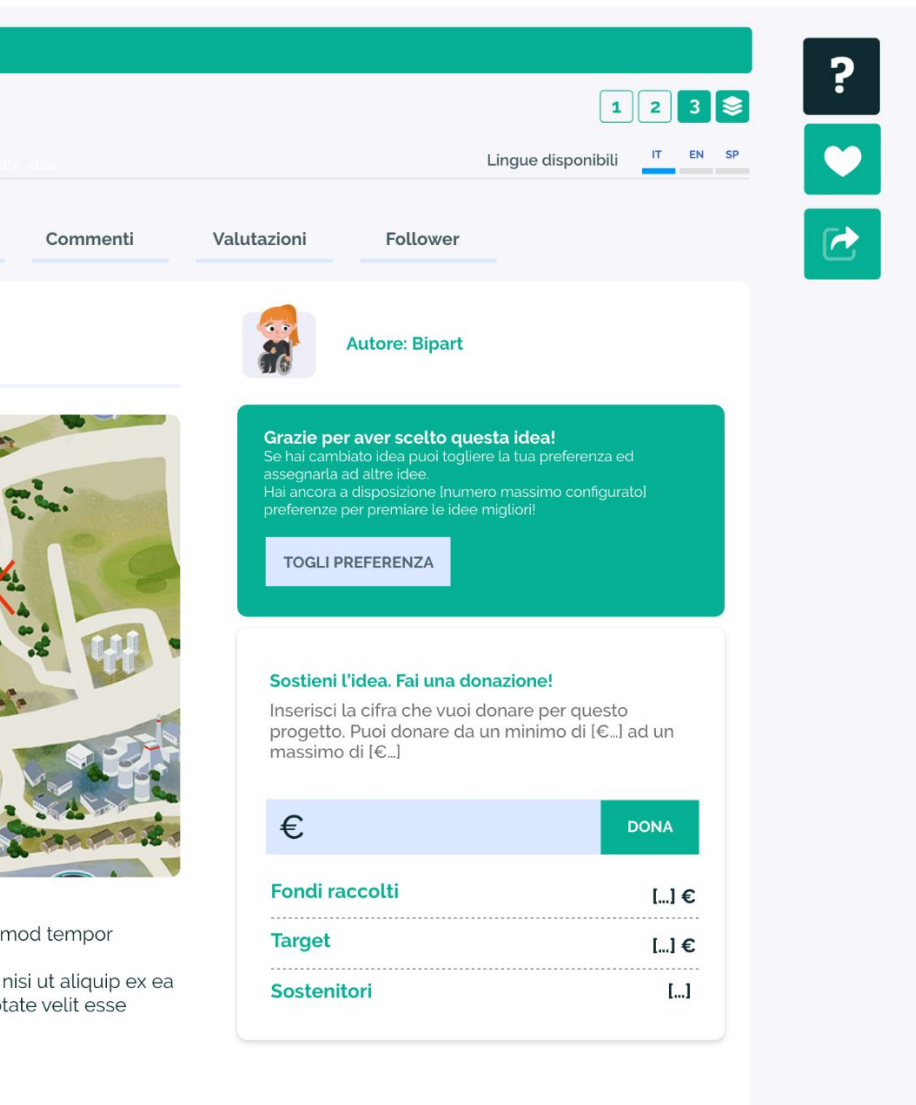

Classifica finale		
1	Non valutata	4
Foster short food supply chains		
2	Non valutata	4
Global Citizenship education		
3	Ammessa	3
Introduction of FTTax + UBI		
4	Non valutata	3
Travel safe in Europe		
5	Ammessa	2
FREE OF CHARGE GARDEN RENTING		
6	Non valutata	2
EU must do better		

## Evaluation

Moreover, **experts** or technical staff appointed by the organization can also **assess** the proposals in order to improve them and/or to approve their eventual implementation.

**Assessment can be made by:**

- selecting the available status \*
- rating with a score
- adding a comment

## Votazione e Crowdfuding

BiPart offers different **voting methodologies** and a safe environment in which to do so. The regularity of the vote is **guaranteed by the authentication of voter accounts** through cross-checks and customizable **tax codes, email, mobile phone** and other specific data of the organization.

A **crowdfunding service integrated** with other existing platforms through special APIs can also be combined with the vote

# Do you want to start a participatory process?

At school, in your municipality, in the company ...  
Our experts will guide you in setting up and using  
the platform for your organization.
